

**Build2Earn™**

# **Public Whitepaper**

***Fueling the Creator Economy on IHRC***

Author: Tristan Schroeder

Founder, IHodlLife Labs™

June 2025 Release

## Introduction

Build2Earn™ is a revolutionary incentive model powering the IHodlLife Rewards Chain™ (IHRC™). At its core, Build2Earn™ turns developers, creators, and infrastructure builders into long-term stakeholders in a new Web3 economic paradigm.

Instead of relying on speculative token drops or centralized bounties, IHRC™ rewards builders based on ongoing utility, loyalty, and verified contribution.

This whitepaper introduces Build2Earn's™ vision, structure, and role within the larger IHRC™ ecosystem.

## What Is Build2Earn™?

Build2Earn™ is a creator-first revenue model. Every contract, app, or tool you deploy on IHRC™ becomes a perpetual reward stream tied to your on-chain identity. This means:

You earn as your work is used

You gain reputation through streaks and trust

You level up over time through upgrades and achievements

The more useful your contribution, the more you earn. Automatically, transparently, and continuously.

## How It Works (Narrative Overview)

### 1. *Deploy & Build*

When a developer or team launches a smart contract or decentralized app on IHRC™, the system records their Builder Signature into the network. This signature becomes the anchor point for future attribution.

### 2. *Use & Earn*

Every time users interact with your contracts, minting, staking, transacting, or integrating into other systems, a portion of ecosystem rewards flows back to you.

This is known as ***Builder REV™***, and it grows in tandem with your:

Contract popularity

Personal trust score

Streak and loyalty history

### 3. *Level Up & Lead*

Builders can unlock Smart Earning Contracts™ (SECs™) that represent tiers of contribution. These soulbound digital credentials evolve with your work, giving you access to:

Revenue multipliers

Community reputation

Governance rights in the IHodl DAO™

Featured spotlights and promotional support

### 💡 Key Features (In Plain Language)

Real Utility = Real Earnings: No hype. The more your tools get used, the more you earn.

Soulbound Identity: Each builder is verified and tied to their contributions using a transparent system.

Loyalty Matters: Consistent builders gain streaks, unlock upgrades, and climb leaderboards.

Gamified Rewards: Builders can earn boost NFTs, evolve avatars, and become known across the ecosystem.

Fair Distribution: You don't need to know the right people. The system rewards code, not clout.

## **Why Build2Earn™ Matters**

In Web2, builders are often paid once and forgotten. In Web3, they're promised the moon but often get dust.

Build2Earn™ flips the script.

It makes long-term builder success the foundation of a healthy, thriving blockchain. It's part of a greater belief:

Those who build the future should own it.

Whether you're a solo dev, a startup, or a decentralized community, Build2Earn™ makes it possible to:

Launch quickly

Earn transparently

Grow your reputation

Be part of a values-aligned ecosystem

## **Who Should Join?**

Smart contract developers

App builders

Open-source contributors

Terminal integrators

AI-crypto engineers

Web3 toolmakers

DAO automation specialists

If you're building for impact, IHRC™ is building for you.

### **What This Paper Does Not Reveal**

To protect key innovations, this public whitepaper:

Does not disclose specific reward multipliers

Does not explain internal fee routing logic

Does not detail proprietary upgrade formulas

Does not publish smart contract templates or source code

Those details are reserved for verified builders or partners under NDA or within the IHodlLife™ developer portal.

## What's Coming Next

Build2Earn™ will continue expanding in:

Builder Dashboards

Hackathons and Grants

SEC™ Tiers and Boosts

DevChain (early-access test network)

Global Builder Showcases

Builders will soon be able to stake their code, unlock achievements, and join the elite creator class of the IHRC economy.

## ❧ Conclusion

*Build2Earn™ isn't just a protocol. It's a movement:*

A global call to creators to build what matters and earn what they deserve.

Welcome to the era where your code is your capital.

Join the Build2Earn™ revolution with the IHodLife Rewards Chain™ (IHRC)
